

Letnja škola je jedinstvena prilika za učenje, razmenu iskustava i upoznavanje novih kolega koji gaje ista interesovanja za Asset Management.

Imajući u vidu uslove poslovanja na domaćem i evropskom tržištu, asset management ima značajnu ulogu u efikasnom smanjenju troškova poslovanja i postizanja isplative, konkretne i konkurentske prednosti.

U cilju informisanja o značenju i značaju asset management-a, Društvo održavalaca tehničkih sistema organizuje **Letnju Školu Asset Management 2018**.

Asset Management će biti predstavljen kroz set disciplina, metoda, procedura i alata koji omogućavaju preduzeću da planira, stvara, nabavlja, održava, eksploatiše, sanira, zamenjuje, uvećava i otuđuje infrastrukturna sredstva na troškovno najefikasniji i najodrživiji način, po nižim ukupnim troškovima životnog ciklusa sredstava. Sve to imajući u vidu nivo usluga koje zahtevaju i mogu da plate postojeće i buduće generacije, kako potrošača, tako i osnivača, i uz prihvatljiv stepen rizika po sopstveno poslovanje, društvenu zajednicu, bezbednost i životnu sredinu.

Ideja **LŠAM** je da se okupe ljudi radi razmene iskustava i diskusije o sadašnjosti i budućnosti aset menadžmenta, sa ciljem osposobljavanja za upravljanje imovinom preduzeća na pouzdan i održiv način.

LŠAM	04.06.2018.	05.06.2018.	06.06.2018.	07.06.2018.	08.06.2018.	09.06.2018.	10.06.2018.
Pre podne		Samostalna izrada Prvog i Drugog zadatka	Predavanja	Predavanja i zajednička izrada Trećeg i Četvrtog zadatka	Industrijska poseta	Sportska takmičenja u basketu i tenisu	Izlet brodom i zajednički ručak
Posle podne	Registracija, podela radnog materijala, predstavljanje i dodela Prvog i Drugog zadatka	Predavanja	Predavanja	Završni test	Svečana večera i uručenje Sertifikata		

PROGRAM:

- Upravljanje i organizacija sistema održavanja
- Pouzdanost i pogodnost održavanja tehničkih sistema
- Metode i tehnike održavanja
- ISO 55001
- KPI Maintenance

Program **LŠAM** spaja najbolje lokalno znanje i iskustvo iz oblasti održavanja, modernizovano i usklađeno sa preporukama Evropske federacije nacionalnih društava održavanja (European Federation of National Maintenance Societies-EFNMS).

LŠAM obuhvata i proveru stečenog znanja, tako da polaznici nakon uspešno položenih testova i urađenih vežbi, dobijaju sertifikat:

„ASSET MANAGER“

KOME JE NAMENJENA?

LŠAM je namenjena edukaciji rukovodilaca, menadžmenta i top-menadžmenta u cilju njihovog usavršavanja, podizanja nivoa rada i efikasnosti i boljeg pozicioniranja u poslovnom okruženju.

REZULTAT:

LŠAM se sastoji iz predavanja, individualnog i timskog rada, radionica i prezentacija.

Predstavljena praktična iskustva i usvojena teorijska znanja nakon realizovanog treninga osposobljavaju polaznike za samostalno:

- formiranje Asset Management plana
- analiziranje i razumevanje trenutnog stanja sredstava
- definisanje potrebnog nivoa usluga
- određivanje kritičnih sredstava za održivost performansi sistema
- definisanje strategije eksploatacije, održavanja i kapitalnih investicija koji obezbeđuju najmanje „ukupne troškove životnog ciklusa sredstava“
- definisanje dugoročne strategije finansiranja

INVESTICIJA:

350 EUR +pdv, ili u dinarskoj protivvrednosti **42.000 RSD +pdv**
NAPOMENA: Polaznici **LŠAM** mogu sami da obezbede smeštaj.
Za zainteresovane su obezbeđeni posebni uslovi smeštaja u hotelu Slovenska plaža

Organizator zadržava pravo odlaganja i/ili otkazivanja u slučaju nedovoljnog broja prijavljenih kandidata.

Summer School is a unique opportunity to learn, share experiences and meet new colleagues who share the same interests for Asset Management.

Bearing in mind the conditions of business on the domestic and European market, the asset management plays an important role in effectively reducing the costs of doing business and achieving cost-effective, concrete and competitive advantages.

For the sake of learning about the meaning and importance of the asset management, the Technical Systems Maintenance Society has organized the **Summer School in Asset Management 2018**.

Asset Management will be presented through a set of disciplines, methods, procedures and tools that allow the company to plan, create, acquire, maintain, exploit, sanitize, replace, increase and alienate infrastructural assets in the most cost-efficient and sustainable manner, at a lower total cost of the assets life cycle. All this, taking into account the level of services that demand and can be pay for by existing and future generations, both consumers and founder, and with an acceptable degree of risk for their own business, social community, security and the environment.

The idea of SSAM is to gather people to exchange experiences and discuss the present and future of asset management, with the goal of training in managing assets of the company in a reliable and sustainable way.

SSAM	04.06.2018.	05.06.2018.	06.06.2018.	07.06.2018.	08.06.2018.	09.06.2018.	10.06.2018.
Before noon		Individual work on the First and Second Task	Lectures	Lectures and joint work on the Third and Fourth task	Industrial visit	Sports competitions in basket and tennis	Boat trip and lunch
In the afternoon	Registration, distribution of work material, introduction and assignment of the first and second tasks	Lectures	Lectures	Final test	Gala dinner and awarding of the Certificates		

PROGRAM:

- Management and organization of the maintenance system
- Reliability and convenience of technical systems maintenance
- Maintenance methods and techniques
- ISO 55001
- KPI Maintenance

SSAM program combines the best local knowledge and experience in the field of maintenance, modernized and in accordance with the recommendations of the European Federation of National Maintenance Societies (EFNMS).

SSAM includes testing the acquired knowledge, so that after successfully passing tests and exercises, the participants receive a certificate:

„ASSET MANAGER“

WHO IS IT FOR?

SSAM aims at educating staff, management and top management in order to improve, raise work levels and efficiency to a better position in the business environment.

RESULTS:

SSAM consists of lectures, individual and team work, workshops and presentations.

The presented practical experiences and the adopted theoretical knowledge train the participants to independently:

- create an Asset Management plan
- analyze and understand the current state of assets
- define the required level of services
- determine critical means for sustaining system performance
- define a strategy of exploitation, maintenance and capital investments that provide at least the "total cost of the assets life cycle"
- define a long-term financing strategy

FEE:

350 EUR +vat, or 42.000 RSD +vat (RSD equivalent)

NOTE: Participants of SSAM arrange accommodation themselves. Special accommodation conditions in the Slovenska plaža hotel is provided for the interested participants.
